D-Day Invasion iMinds, 2014-05-14 The story behind D-Day begins in 1939 when Nazi Germany, led by Adolf Hitler, attacked Poland and ignited World War Two. The following year, the Germans occupied France and Western Europe and launched a vicious air war against Britain. In 1941, they invaded the Soviet Union. Seemingly unstoppable, the Nazis now held virtually all of Europe. They imposed a ruthless system of control and unleashed the horror of the Holocaust. However, by 1943, the tide had begun to turn in favor of the Allies, the forces opposed to Germany. In the east, despite huge losses, the Soviets began to force the Germans back.

Once you do, you'll be in good company -- more than 100,000 small businesses and some corporations are already looking to take advantage of these free Google offerings. This book: Explains how to create, save and share each of Google's web-based office applications Offers separate sections for Docs and Spreadsheets, Google Calendar, and Gmail Demonstrates how to use these applications in conjunction with one another Gives you crystal-clear and jargon-free explanations that will satisfy users of all technical levels Many of you already use Gmail, but do you know its full potential? Do you know how you can increase its power by using Gmail with Doc and Spreadsheets and Google Calendar? You'll find out with Google Apps: The Missing Manual. You'll also come to understand why large corporations such as General Electric and Proctor & Gamble are taking a long, hard look at these applications.

The Back of the Napkin (Expanded Edition) Dan Roam, 2009-12-31 The acclaimed bestseller about visual problem solving--now bigger and better There is no more powerful way to prove that we know something well than to draw a simple picture of it. And there is no more powerful way to see hidden solutions than to pick up a pen and draw out the pieces of our problem. So writes Dan Roam in *The Back of the Napkin*, the international bestseller that proves that a simple drawing on a humble napkin can be more powerful than the slickest PowerPoint presentation. Drawing on twenty years of experience and the latest discoveries in vision science, Roam teaches readers how to clarify any problem or sell any idea using a simple set of tools. He reveals that everyone is born with a talent for visual thinking, even those who swear they can't draw. And he shows how thinking with pictures can help you discover and develop new ideas, solve problems in unexpected ways, and dramatically improve your ability to share your insights. Take Herb Kelleher and Rollin King, who figured out how to beat the traditional hub-and-spoke airlines with a bar napkin and a pen. Three dots to represent Dallas, Houston, and San Antonio. Three arrows to show direct flights. Problem solved, and the picture made it easy to sell Southwest Airlines to investors and customers. Now with more color, bigger pictures, and additional content, this new edition does an even better job of helping you literally see the world in a new way. Join the teachers, project managers, doctors, engineers, assembly-line workers, pilots, football coaches, marine drill instructors, financial analysts, students, parents, and lawyers who have discovered the

power of solving problems with pictures.

Architectural Presentation Bert Bielefeld, 2014 Students of architecture are confronted at the beginning of their studies with a wealth of different ways in which to visually present their designs. Expressing ideas in the form of drawings and models is usually required in the early stages of studying: learning by doing is the only way for students to quickly develop a repertoire for their design work. However, there are important issues to consider between the phases of devising the spatial concept and recreating it in a two- or three-dimensional drawing or physical model: How to construct a perspective freehand drawing? What plan drawings are necessary to present my design? What scale should my model be and what materials should I use to construct it? Basics architectural presentation conveys possible ways to present architectural projects throughout the various project phases. In an informative and practical approach, the publication discusses the basics of architectural representation from freehand drawing, which is especially important in the design phase, to the plan drawing, model, and architecture photography.

When The Scientist Presents: An Audio And Video Guide To Science Talks (With Dvd-rom) Jean-luc Lebrun, 2009-08-21 Check out the author's website at www.scientific-presentations.com This book looks at the presenting scientist from a novel angle: the presenter-host. When scientists give a talk, the audience ("guests") expects the title of the talk to determine presentation content, they require understandable slides, and they demand visible and audible scientific authority. To each expectation corresponds a set of skills: personal (voice, host qualities, time control), technical (presentation tools and slide design), and scientific (Q&A, slide content). The author takes an original human factor view of the presentation delivery, in which the audience is easily distracted, rapidly forgetful, and increasingly impatient. Thus, insightful pointers are given on how to deliver the talk, how to craft the slides, and how to prevent the computer from rendering the presenting host-scientist into a "ghost". In addition, the book goes in-depth over the treatment of questions by examining the motives and style of the questioners, and advising on how best to answer to each type of questioner. The book comes with a DVD for audio and video examples, and includes essential PowerPoint and Keynote techniques that a presenter cannot live without. Contents: Content Selection: Paper and Oral Presentation: The Difference Content Filtering Criteria Audience Expectations: General Audience Expectations Scientific Audience Expectations The Slides: Five Slide Types, Five Roles Slide Design The Presenter: The Master of Tools Scientist and Perfect Host The Grabbing Voice The Answerable Scientist Readership: Students, graduates, postgraduates, and professionals seeking help in improving their scientific presentation skills.
