InterViews Steinar Kvale, Svend Brinkmann, 2009 The First Edition of InterViews has provided students and professionals in a wide variety of disciplines with the “whys” and “hows” of research interviewing, preparing students for learning interviewing by doing interviews and by studying examples of best practice. The thoroughly revised Second Edition retains its original seven-stage structure, continuing to focus on the practical, epistemological, and ethical issues involved with interviewing. Authors Steinar Kvale and Svend Brinkmann also include coverage of newer developments in qualitative interviewing, discussion of interviewing as a craft, and a new chapter on linguistic modes of interview analysis. Practical and conceptual assignments, as well as new “tool boxes,” provide students with the means to dig deeper into the material presented and achieve a more meaningful level of understanding. New to This Edition · Includes new developments in qualitative interviewing: New materials cover narrative, discursive, and conversational analyses. · Presents interviewing as a social practice: Knowledge produced by interviewing is discussed as linguistic, conversational, narrative, relational, situated, and pragmatic. · Addresses a variety of interviews forms: In addition to harmonious, empathetic interviews, the authors also cover confrontational interviews. Intended Audience This text is ideal for both novice and experienced interview researchers as well as graduate students taking courses in qualitative and research methods in the social sciences and health sciences, particularly departments of Education, Nursing, Sociology, Psychology, and Communication. Praise for the previous edition: “I think this is one of the most in-depth treatments of the interview process that I have seen. The frank and realistic approach that the authors take to this topic is rather unique and will be very reassuring to researchers who are undertaking an interview study for the first time.” —Lisa M. Diamond, University of Utah

The Employable Sociologist Martha A. Martinez, 2023-11-15 This book addresses a gap in and outside academia: how to help Sociology undergraduates develop skills for career success while maintaining a sociologically rigorous approach. Matching sociological theories, methods, and knowledge with contemporary capitalistic managerial and work practices, it shows how sociology undergraduates are not only employable but have marketable advantages over graduates of other disciplines. A student following the program embodied in this book will actively nurture a strong sociological identity; create a job search plan integrating personal and disciplinary interests, values, and skills; design job application materials that provide the best fit for specific jobs and organizations; and launch a satisfying career path. Beyond an employment guide, it will facilitate the teaching of career development by Sociology faculty; increase students' ongoing confidence in their potential; and provide a solid foundation for communicating the transformative power of Sociology to employers and managers in the government, business, and non-profit sectors.

Advances in Research on Age in the Workplace and Retirement Cort W. Rudolph, Hannes Zacher, Susanne Scheibe, 2018-01-16 Shifts in the age composition of the workforce coupled with dynamic definitions of retirement represent important issues that influence work processes and, more generally, the experience of working across one's career. For example, redefinitions of careers and the changing nature of working have contributed to the emergence of distinct forms and patterns of work experiences across the prototypical work lifespan. Likewise, older individuals are increasingly delaying retirement in favor of longer-term labor force participation. The study of age and work, and work and retirement by industrial, work, and organizational (IWO) psychologists and scholars of human resources management and organizational behavior (HR/OB) has recently proliferated in part as a result of such trends, along with the recognition that age-related processes are important indicators of various proximal (e.g., job attitudes, work behaviors, work motives, and wellbeing) and distal outcomes (e.g., sustainable employability, climates for aging, and firm performance) at various levels of abstraction in modern work environments. Recent theoretical advances have suggested that age, along with individual psychological factors and various contextual influences can jointly influence work outcomes that contribute to long-term employment success, including work performance, job attitudes, work orientations, and motivations. Similar theoretical developments concerning

retirement have postulated individual and contextual elements that drive success in the transition from career and work roles to non-work and leisure as well as post-retirement bridge employment roles. In this Research Topic, we aim to curate a collection of papers that are representative of current trends and advances in thinking about and investigating the role of age in workplace processes and the changing nature of retirement. Our hope is to showcase various contemporary ideas and rigorous empirical studies as a means to inform broader thinking and to support enhanced theorizing and organizational practice regarding these processes.
