Breaking Apart Intimate Partner Violence and Abuse Shondrah Tarrezz Nash, Lisa Michele Shannon, Monica Himes, Lynn Geurin, 2023-07-21 Breaking Apart Intimate Partner Violence and Abuse provides a thorough examination of intimate partner violence and abuse, encompassing the nature, influences, and impact of its presence in interpersonal relationships. By pulling together representative studies and other evidence-based analyses by researchers and interventionists, this comprehensive overview surveys the prevalence, patterns, and common risk factors among a number of demographics, including women, men, transpeople, partners in opposite- and same-sex relationships, teen dating partners, later-life partners and abused partners with disabilities. The authors also disentangle - that is, break apart - the factors of race, class, gender, sexuality, gender expression and culture by exploring their effects on experiences of intimate partner violence and abuse perpetration and victimization. Although less scrutinized in current literature on the topic, discourse and

institutional barriers to abused women's well-being and safety are also delved into, particularly those exacerbated by rural isolation, non-national status and theologies. The authors supplement their in-depth overview by highlighting protective measures and resources throughout, identifying treatments and public health approaches to violence and abuse intervention and prevention, as well as incorporating discussion exercises and illustrations that extend the book's concepts into real-life settings. In their exploration of the forms, causes, prevalence, and consequences of intimate partner violence and abuse among different groups, the authors address the problem with both nuance and scope. Combined with their evidence-based recommendations, the book offers valuable insight for students, researchers, and practitioners in the fields of domestic and family abuse and intimate partner violence.

Animal-Assisted School Counseling Elizabeth Kjellstrand Hartwig, 2024-06-19 Animal-Assisted School Counseling (AASC) is a hands-on resource that provides invaluable information for school counselors interested in partnering with a therapy animal on campus to help students meet social and emotional goals. This book presents a wealth of resources for school counselors and school-based mental health practitioners to incorporate animal partners on school campuses with individual students and groups and in classroom and schoolwide settings. Using the American School Counselor Association (ASCA) National Model framework, this book presents AASC interventions that can be implemented as part of the multitiered system of support to address students' mental health needs. The text also meets the important demand for accountability in school counseling by providing resources for assessing the effectiveness of AASC interventions for meeting student and school outcome goals. Addressing such issues as getting school district buy-in, choosing an animal partner, preparing the school for an animal partner, theoretical applications of AASC, and student-affirming AASC services, the book is organized such that each chapter builds upon the next so school counselors understand what steps to take to become an effective AASC team. Ideal for the school counselor, social worker, or psychologist who may not have specific training in AASC, this book will encourage school mental health practitioners to seek out training programs to become an AASC team.

Creating Experiential Learning Opportunities for Language Learners Melanie Bloom, Carolyn Gascoigne, 2017-03-08 While much research has been done on experiential learning opportunities in study abroad settings, there are fewer publications devoted to experiential learning in the domestic context. This volume aims to fill that gap by providing a collection of chapters highlighting research-based innovations in experiential learning in domestic settings. The book focuses on three experiential learning contexts: community engagement experiences, professional engagement experiences and other unique experiential contexts such as language camps and houses. The collection focuses on the US context but the research projects and curricular innovations described here can serve as models for educators working in other local contexts and will encourage interested practitioners to explore experiential learning opportunities in their local areas. It will also provide the reader with a better understanding of this growing field of inquiry and should appeal to graduate students and researchers who are interested in experiential language learning.
