**New York Magazine** ,1997-06-23 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

**Bombay Brokers** Lisa Björkman,2021-04-05 A political party worker who produces crowds for electoral rallies. A “prison specialist” who serves other people’s prison sentences in exchange for a large fee. An engineer who is able to secure otherwise impossible building permits. These and other dealmakers—whose behind-the-scenes expertise and labor are often invisible—have an intrinsic role in the city's functioning and can be indispensable for navigating everyday life in Bombay, one of the world’s most complex, dynamic, and populous cities. Bombay Brokers collects profiles of thirty-six such “brokers.” Written by anthropologists, artists, city planners, and activists, these character sketches bring into relief the paradox that these brokers’ knowledge and labor are simultaneously invisible yet essential for Bombay’s functioning. Their centrality reveals the global-scale paradoxes and gaps that these brokers mediate and bridge. In this way, Bombay Brokers prompts a reconsideration of what counts as legitimate and valuable knowledge and labor while offering insight into changing structures of power in Bombay and around the globe. *The Geography of Injustice* Barak Kushner,2024-03-15 In *The Geography of Injustice*, Barak Kushner argues that the war

crimes tribunals in East Asia formed and cemented national divides that persist into the present day. In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire. At its conclusion one of the judges voiced dissent, claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge. War crimes tribunals, Kushner shows, allow for the history of the defeated to be heard. In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate. The Tokyo Trial courtroom, as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia, were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two. These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region. The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption. The Geography of Injustice offers compelling evidence that despite the passage of seven decades since the end of the war, East Asia is more divided than united by history.

**Architects of an American Landscape** Hugh Howard,2022-01-25 A dual portrait of America's first great architect, Henry Hobson Richardson, and her finest landscape designer, Frederick Law Olmsted—and their immense impact on America As the nation recovered from a cataclysmic war, two titans of design profoundly influenced how Americans came to interact with the built and natural world around them through their pioneering work in architecture and landscape design. Frederick Law Olmsted is widely revered as America's first and finest parkmaker and environmentalist, the force behind Manhattan's Central Park, Brooklyn's Prospect Park, Biltmore's parkland in Asheville, dozens of parks across the country, and the preservation of Yosemite and Niagara Falls. Yet his close friend and sometime collaborator, Henry Hobson Richardson, has been almost entirely forgotten today, despite his outsized influence on American architecture—from Boston's iconic Trinity Church to Chicago's Marshall Field Wholesale Store to the Shingle Style and the wildly popular "open plan" he conceived for family homes. Individually they created much-beloved buildings and public spaces. Together they married natural landscapes with built structures in train stations and public libraries that helped drive the shift in American life from congested cities to developing suburbs across the country. The small, reserved Olmsted and the passionate, Falstaffian Richardson could not have been more different in character, but their sensibilities were closely aligned. In chronicling their intersecting lives and work in the context of the nation's post-war renewal, Hugh Howard reveals how these two men created original all-American idioms in architecture and landscape that influence how we enjoy our public and private spaces to this day.

Houston, We Have a Narrative Randy Olson, 2015-09-15 Communicate more effectively about science—by taking a page from Hollywood and improving your storytelling skills. Ask a scientist about Hollywood, and you'll probably get eye rolls. But ask someone in Hollywood about science, and they'll see dollar signs: Moviemakers know that science can be the source of great stories, with all the drama and action that blockbusters require. That's a huge mistake, says Randy Olson: Hollywood has a lot to teach scientists about how to tell a story—and, ultimately, how to do science better. With *Houston, We Have a Narrative*, he lays out a stunningly simple method for turning the dull into the dramatic. Drawing on his unique background, which saw him leave his job as a working scientist to launch a career as a filmmaker, Olson first diagnoses the problem: When scientists tell us about their work, they pile one moment and one detail atop another moment and another detail—a stultifying procession of “and, and, and.” What we need instead is an understanding of the basic elements of story, the narrative structures that our brains are all but hardwired to look for—which Olson boils down, brilliantly, to “And, But, Therefore,” or ABT. At a stroke, the ABT approach introduces momentum (“And”), conflict (“But”), and resolution (“Therefore”)—the fundamental building blocks of story. As Olson has shown by leading countless workshops worldwide, when scientists' eyes are opened to ABT, the effect is staggering: suddenly, they're not just talking about their work—they're telling stories about it. And audiences are captivated. Written with an uncommon verve and enthusiasm, and built on principles that are applicable to fields far beyond science, *Houston, We Have a Narrative* has the power to transform the way science is understood and appreciated, and ultimately how it's done.

Ecopsychology, Phenomenology, and the Environment Douglas A. Vakoch, Fernando Castrillón, 2014-02-17 This book seeks to confront an apparent contradiction: that while we are constantly attending to environmental issues, we seem to be woefully out of touch with nature. The goal of *Ecopsychology, Phenomenology and the Environment* is to foster an enhanced awareness of nature that can lead us to new ways of relating to the environment, ultimately yielding more sustainable patterns of living. This volume is different from other books in the rapidly growing field of ecopsychology in its emphasis on phenomenological approaches, building on the work of phenomenological psychologists such as Maurice Merleau-Ponty. This focus on phenomenological methodologies for articulating our direct experience of nature serves as a critical complement to the usual methodologies of environmental and conservation psychologists, who have emphasized quantitative research. Moreover, *Ecopsychology, Phenomenology and the Environment* is distinctive insofar as chapters by phenomenologically-sophisticated ecopsychologists are complemented by chapters written by phenomenological researchers of environmental issues with backgrounds in philosophy and geology, providing a breadth and depth of perspective not found in other works written exclusively by psychologists.

**Los Angeles Magazine**, 2003-11 Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture,

entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.

**Wiped Out!** Paul Weightman,2019-05-07 Channel Five predicted a blanket of snow for Thanksgiving weekend--unusual, but not alarming for the little Bainbridge island. What comes is a blinding blizzard, and a mass disappearance of nearly every person Austyn Schmitt knows. He and his family flee, trying to escape the snow and the invisible forces stealing people right from the street? Miles away, Dillon Black battles the same storm. Alone, he attempts to survive as snow envelops his house. When the storm breaks, Dillon makes his way to where he thinks the snow ends, and the world lies empty. Join Dillon, Austyn, and the other survivors as they fight to find the truth about the apocalypse and discover how to live in their new world.

**Medical Retina** Frank G Holz,Richard F. Spaide,2010-03-18 Recent advances in ophthalmic imaging technology have revolutionized fundus examination and contributed significantly in elucidating the pathophysiology of retinal diseases and improving their diagnosis and treatment. It is therefore fitting that this detailed full-color textbook in the Medical Retina series is devoted to ocular imaging. The volume reviews in detail the role of both established and novel forms of imaging, and is designed to be of benefit to clinicians and researchers alike. All of the chapters have been written by internationally recognized experts at the forefront of their fields. The result is a comprehensive, state-of-the-art overview of retinal imaging that should prove informative and useful for everyone interested in the retina. Topics include: •Spectral domain optical coherence tomography (SD-OCT) of macular diseases •Comparison of OCT equipment •Simultaneous SD-OCT and confocal SLO imaging •Ultra-widefield imaging °Autofluorescence imaging •Near-infrared imaging •Macular pigment imaging •Metabolic mapping •Imaging of the choroid •Imaging the vitreous and the vitreoretinal interface with SD-OCT •New developments in OCT technology •Molecular imaging

**Putting the Science in Fiction** Dan Koboldt,2018-10-16 Science and technology have starring roles in a wide range of genres--science fiction, fantasy, thriller, mystery, and more. Unfortunately, many depictions of technical subjects in literature, film, and television are pure fiction. A basic understanding of biology, physics, engineering, and medicine will help you create more realistic stories that satisfy discerning readers. This book brings together scientists, physicians, engineers, and other experts to help you: • Understand the basic principles of science, technology, and medicine that are frequently featured in fiction. • Avoid common pitfalls and misconceptions to ensure technical accuracy. • Write realistic and compelling

scientific elements that will captivate readers. • Brainstorm and develop new science- and technology-based story ideas. Whether writing about mutant monsters, rogue viruses, giant spaceships, or even murders and espionage, Putting the Science in Fiction will have something to help every writer craft better fiction. Putting the Science in Fiction collects articles from Science in Sci-fi, Fact in Fantasy, Dan Koboldt's popular blog series for authors and fans of speculative fiction ([dankoboldt.com/science-in-scifi](http://dankoboldt.com/science-in-scifi)). Each article discusses an element of sci-fi or fantasy with an expert in that field. Scientists, engineers, medical professionals, and others share their insights in order to debunk the myths, correct the misconceptions, and offer advice on getting the details right.

Making Eye Health a Population Health Imperative National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Public Health Approaches to Reduce Vision Impairment and Promote Eye Health, 2017-01-15 The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.
