Understanding International Sport Organisations Lincoln Allison, Alan Tomlinson, 2017-03-27 The governance of international sport is dominated by the SINGOs (sporting international non-governmental organisations). The IOC, FIFA, IAAF and the FIA wield global influence, but how exactly do such complex organisations operate? This important book examines the rise of the SINGOs, their structures, organisational behaviour and their power in the context of modern sport and international politics. Written by two world-leading experts, the book sheds new light on the relationship between these SINGOs and the sports which they govern. It provides a close critical analysis of the policies and practices of the most important international sport organisations, from their historical origins to the present day. Using case studies of key events such as the Olympics and the recent FIFA scandals, it examines the central question of how best to understand the significance of these organisations today. Combining historical insight with original research, *Understanding International Sport Organisations: Principles, Power and Possibilities* is essential reading for anyone with an interest in the politics of sport, the sociology of sport, sport administration, sport business or sport management.

Match-Fixing in Sport Stacey Steele, Hayden Opie, 2017-11-20 Match-fixing represents a greater potential threat to the

integrity of sport than doping. It has been linked to organised crime, illegal drugs and money-laundering. Law enforcement and sporting authorities are struggling to establish legal and regulatory responses to this emerging threat, particularly in light of cross-border internet gambling. This book examines match-fixing and the legal responses to it in three key Asian sporting nations: Australia, Japan and Korea. It explores the significance of legal, regulatory and cultural differences, and draws lessons in terms of best practice and enforcement for legal and sporting authorities around the world. Including key insights from players, the betting industry, law enforcement and prosecution authorities, it discusses the strengths and weakness of current anti-corruption strategies in the three jurisdictions. Match-Fixing in Sport: Comparative Studies from Australia, Japan, Korea and Beyond offers important insights for all students and scholars with an interest in sport studies, law, criminology and Asian studies.

The final section of the book takes in the very latest developments in mass-event sport and the growing but fundamental area of sports commercialisation. Becoming a Better Sports Coach Andreas Carlsson, 2021-09-20 Research on coaching education and development highlights, repeatedly, the difficulties of traditional coaching education to impact coaching practice. Practice seems to be disconnected from scientific theory with few coaches accessing the scientific literature as it too often is presented in dry, academic tones. This volume sets out to provide an integration of theory and everyday practice that to date has not yet been published in the field of coaching science in a text easily used by sports coaches. In order to bridge this theory to practice gap, *Becoming a Better Sports Coach: Development through Theory Application* presents theory and science connected to practice in a way that makes it possible for coaches to test, evaluate and improve upon their existing coaching practice. This hands-on approach sets out to improve coaches' cognition and raising self-awareness as well as improve coaches' learning using specific tools for behavioural feedback and reflection. Improving on self-reflective skills and eliciting feedback on the coach's own behaviour is how coaching practice is improved. What coaching practice includes and what is laid out for coaches in this new text is motivational climate, coaching behaviours, pedagogy, feedback, coach-athlete relationship, each in one chapter. Reflection and behavioural feedback are applied to each of these areas.

Dispute Resolution in Sport David McArdle, 2014-09-19 An increasing number of sport disputes are being resolved by way of arbitration. This is the first book to critically examine the processes and benefits of sportspecific arbitration as compared to litigation. The book explores, in depth, the development of alternative dispute resolutions in sports, paying particular attention to high-profile institutions such as the Court of Arbitration for Sport, the FIFA Football Dispute Resolution Panel and important national-level bodies, and their relationship with national and international-level actors such as the IOC, WADA and the European Union. It also examines in detail the legal frameworks within which sports arbitration systems operate, considers their similarities with other arbitral bodies and considers the extent to which ADR in sport can be seen as a consequence of, and perhaps a solution to, the 'juridification' of sports. Offering a theoretical basis with which to understand the relationship between arbitration and litigation, as well as providing guidance on key contemporary issues and best practice, this book is important reading for students, researchers and practitioners working in sports law, sports management and administration, sports politics, sports ethics, and international organisation.

The Inclusion Imperative Stephen Frost, 2014-02-03 The Inclusion Imperative showcases the inspiring commitment to inclusion the London Olympic and Paralympic Games' organizing committee espoused, and details the techniques and frameworks that enabled it to truly deliver a 'Games for everyone' at London 2012. Diversity and inclusion expert, Stephen Frost, challenges preconceived ideas and strives to inspire professionals to tackle inclusion in their organizations with courage, creativity and talent. With highly relatable examples, The Inclusion Imperative constitutes the best argument to convince sceptics that real diversity and inclusion can deliver more engaged employees and customers, improved employee recruitment and retention, increase productivity and better group decision-making processes. Real inclusion saves money and improves efficiency in the systems of an organisation, making the world a better place as a by-product. Building on concepts that include Diversity 3.0, detailed process journeys, and procurement governance, this is a must-read for HR and diversity officers frustrated with the guidance currently available, as well as for anyone who recognizes the legacy of the 2012 Games in fostering a tolerant and diverse society.
