Start Seeing and Serving Underserved Gifted Students Jennifer Ritchotte,Chin-Wen Lee,Amy Graefe,2020-10-21

2020 TAGT Legacy Book® Award for Educators Winner Flexible tools help teachers see, understand, teach, challenge, and advocate for underserved gifted students. The underrepresentation of students from historically marginalized populations—including English language learners, twice-exceptional students, culturally and linguistically diverse students, and economically disadvantaged students—in our gifted programs and services continues to be a critical issue in education. The importance of a caring and committed teacher who sees and supports the potential in all learners and who respects linguistic diversity and students’ cultural identity cannot be overstated, yet teachers need the knowledge and training to do so. This reader-friendly guide meets that need, promoting equity in gifted education by providing teachers with a variety of flexible tools to nurture the academic and affective growth of their gifted students from traditionally underserved populations. Over fifty strategies are outlined within five chapters addressing how teachers can see, understand, teach, challenge, and advocate for their underserved gifted learners in all content areas. The authors share numerous student quotes, teacher anecdotes, and spotlights on successful school efforts. Digital downloads include all forms from the book and a PDF presentation. A free PLC/Book Study Guide for use in professional development is also available.

Value-ology Simon Kelly, Paul Johnston, Stacey Danheiser, 2017-01-19 This book offers both marketing and sales professionals a rare combined insight into both worlds to continuously capture customer intelligence and create value, by blending detailed research with academic rigor and commercial experience of the authors in both Europe and North America. It has never been easier to produce great marketing content and sales collateral. And yet, 90% of the content that marketing produces is NEVER used by sales. Why not? Because it’s not relevant to the audience or the prospect doesn’t even know the content exists. Furthermore 58% of deals end up in “no decision” because Sales has not presented value effectively. Companies are creating lots of noise but failing to resonate with the customers. So what? The danger, aside from marketing wasting tens of millions of dollars on ineffective content and tools, is that customers will disengage. 94% of prospects say they have completely disengaged with vendors because of irrelevant content. In order to grow fast, the authors argue, Sales and Marketing teams need to slow down. They need to work together to truly understand their customers’ needs, wants, motivations and pain points so that they can offer customized “value”. The book sets out how to establish a formal program to continuously capture customer intelligence and insights – the shiny gems of understanding that help prospects to connect the dots – so that value can be consistently articulated in marketing and sales conversations. By integrating the best ideas and practice from commercial experience and academic research the authors show how to create value across the entire marketing and sales value chain – not only get a new customer, but to continue to create value for future purchases by creating “post-sales” value.

Grid Economics and Business Models Rajkumar Buyya, Omer F. Rana, 2009-08-18 GECON - Grid Economics and Business Models Cloud computing is seen by many people as the natural evolution of Grid computing concepts. Both, for instance, rely on the use of service-based approaches for provisioning compute and data resources. The importance of understanding business models and the economics of distributed computing systems and services has generally remained unchanged in the move to Cloud computing. This understanding is necessary in order to build sustainable e-infrastructure and businesses around this paradigm of sharing Cloud services. Currently, only a handful of companies have created successful businesses around Cloud services. Among these, Amazon and Salesforce (with their offerings of Elastic Compute Cloud and force.com among other offerings) are the most prominent. Both companies understand how to charge for their services and how to enable commercial transactions on them. However, whether a wide-spread adoption of Cloud services will occur has to be seen. One key enabler remains the ability to support suitable business models and charging schemes that appeal to users outsourcing (part of) their internal business functions. The topics that have been addressed by the authors of accepted papers reflect the above-described situation and the need for a better understanding of Grid economics. The topics range from

market mechanisms for trading computing resources, capacity planning, tools for modeling economic aspects of service-oriented systems, architectures for handling service level agreements, to models for economically efficient resource allocation.

Grid and Cloud Computing Katarina Stanoevska, Thomas Wozniak, Santi Ristol, 2009-11-04 In today's dynamic business environment, IT departments are under permanent pressure to meet two divergent requirements: to reduce costs and to support business agility with higher flexibility and responsiveness of the IT infrastructure. Grid and Cloud Computing enable a new approach towards IT. They enable increased scalability and more efficient use of IT based on virtualization of heterogeneous and distributed IT resources. This book provides a thorough understanding of the fundamentals of Grids and Clouds and of how companies can benefit from them. A wide array of topics is covered, e.g. business models and legal aspects. The applicability of Grids and Clouds in companies is illustrated with four cases of real business experiments. The experiments illustrate the technical solutions and the organizational and IT governance challenges that arise with the introduction of Grids and Clouds. Practical guidelines on how to successfully introduce Grids and Clouds in companies are provided.
