*Traffic Flow Dynamics* Martin Treiber, Arne Kesting, 2012-10-11 This textbook provides a comprehensive and instructive coverage of vehicular traffic flow dynamics and modeling. It makes this fascinating interdisciplinary topic, which to date was only documented in parts by specialized monographs, accessible to a broad readership. Numerous figures and problems with solutions help the reader to quickly understand and practice the presented concepts. This book is targeted at students of

physics and traffic engineering and, more generally, also at students and professionals in computer science, mathematics, and interdisciplinary topics. It also offers material for project work in programming and simulation at college and university level. The main part, after presenting different categories of traffic data, is devoted to a mathematical description of the dynamics of traffic flow, covering macroscopic models which describe traffic in terms of density, as well as microscopic many-particle models in which each particle corresponds to a vehicle and its driver. Focus chapters on traffic instabilities and model calibration/validation present these topics in a novel and systematic way. Finally, the theoretical framework is shown at work in selected applications such as traffic-state and travel-time estimation, intelligent transportation systems, traffic operations management, and a detailed physics-based model for fuel consumption and emissions.

**The Bridge at Andau** James A. Michener, 2015-06-09 The Bridge at Andau is James A. Michener at his most gripping. His classic nonfiction account of a doomed uprising is as searing and unforgettable as any of his bestselling novels. For five brief, glorious days in the autumn of 1956, the Hungarian revolution gave its people a glimpse at a different kind of future—until, at four o'clock in the morning on a Sunday in November, the citizens of Budapest awoke to the shattering sound of Russian tanks ravaging their streets. The revolution was over. But freedom beckoned in the form of a small footbridge at Andau, on the Austrian border. By an accident of history it became, for a few harrowing weeks, one of the most important crossings in the world, as the soul of a nation fled across its unsteady planks. Praise for *The Bridge at Andau* "Precise, vivid . . . immeasurably stirring."—The Atlantic Monthly "Dramatic, chilling, enraging."—San Francisco Chronicle "Superb."—Kirkus Reviews "Highly recommended reading."—Library Journal

Nationally Competitive Scholarships National Association of Fellowships Advisors. Conference,2007-07-01 Guidance for students applying for national scholarships Nationally competitive scholarship programs attract thousands of applicants every year for a relatively small number of awards. Providing informed and dedicated support to applicants is the critical and fundamental goal of the National Association of Fellowships Advisors (NAFA). The thirteen essays in this volume are a direct result of the 2005 NAFA conference held in Louisville. Contributors include both scholarship advisors and representatives of the Truman and Marshall foundations as well as the former executive director of the US-UK Fulbright Commission. These essays provide practical information ranging from helping faculty write persuasive letters of recommendation to serving international students effectively to negotiating the British and Irish high-educational systems. In addition to providing the students with useful tips, these essays also reflect on the broader impact of the application process. They address the successes of students who do not win as well as the public-service involvement of those who do as they give back to their campus, local, and global communities.

*Work Your Career* Loleen Berdahl,Jonathan Malloy,2018-01-01 The supposed extinction of the Indigenous Beothuk people of Newfoundland in the early nineteenth century is a foundational moment in Canadian history. Increasingly under scrutiny, non-Indigenous perceptions of the Beothuk have had especially dire and far-reaching ramifications for contemporary

Indigenous people in Newfoundland and Labrador. *Tracing Ochre* reassesses popular beliefs about the Beothuk. Placing the group in global context, Fiona Polack and a diverse collection of contributors juxtapose the history of the Beothuk with the experiences of other Indigenous peoples outside of Canada, including those living in former British colonies as diverse as Tasmania, South Africa, and the islands of the Caribbean. Featuring contributions of Indigenous and non-Indigenous thinkers from a wide range of scholarly and community backgrounds, *Tracing Ochre* aims to definitively shift established perceptions of a people who were among the first to confront European colonialism in North America.--
