The SAGE Encyclopedia of Journalism Gregory A. Borchard,2022-01-28 Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted. Whether it is National Public Radio in the morning or the lead story on the Today show, the morning newspaper headlines, up-to-the-minute Internet news, grocery store tabloids, Time magazine in our mailbox, or the nightly news on television, journalism pervades our lives. The Encyclopedia of Journalism covers all significant dimensions of journalism, such as print, broadcast, and Internet journalism; U.S. and international perspectives; and history, technology, legal issues and court cases, ownership, and economics. The encyclopedia will consist of approximately 500 signed entries from scholars, experts, and journalists, under the direction of lead editor Gregory Borchard of University of Nevada, Las Vegas.

Blissful Blindness Dariusz Tołczyk,2023-09-05 The most heinous Soviet crimes - the Red Terror, brutal collectivization, the Great Famine, the Gulag, Stalin's Great Terror, mass deportations, and other atrocities - were treated in the West as a controversial topic. With the Cold War dichotomy of Western democracy versus Soviet communism deeply imprinted in our minds, we are not always aware that these crimes were very often questioned, dismissed, denied, sometimes rationalized,

and even outright glorified in the Western world. Facing a choice of whom to believe –the survivors or Soviet propaganda– many Western opinion leaders chose in favor of Soviet propaganda. Even those who did not believe it behaved sometimes as if they did. *Blissful Blindness* explores Western reactions (and lack thereof) to Soviet crimes from the Bolshevik revolution to the collapse of Soviet communism in order to understand ideological, political, economic, cultural, personal, and other motivations behind this puzzling phenomenon of willful ignorance. But the significance of Dariusz Tolczyk's book reaches beyond its direct historical focus. Written for audiences not limited to scholars and specialists, this book not only opens one's eyes to rarely examined aspects of the twentieth century but also helps one see how astonishingly relevant this topic is in our contemporary world.

Spring Fever Andrew C McCarthy,2012-09-18 The first fundamental truth about the Arab Spring is that there never was one. The salient fact of the Middle East, the only one, is Islam. The Islam that shapes the Middle East inculcates in Muslims the self-perception that they are members of a civilization implacably hostile to the West. The United States is a competitor to be overcome, not the herald of a culture to be embraced. Is this self-perception based on objective truth? Does it reflect an accurate construction of Islam? It is over these questions that American officials and Western intellectuals obsess. Yet the questions are irrelevant. This is not a matter of right or wrong, of some posture or policy whose subtle tweaking or outright reversal would change the facts on the ground. This is simply, starkly, the way it is. Every human heart does not yearn for freedom. In the Islam of the Middle East, freedom means something very nearly the opposite of what the concept connotes to Westerners – it is the freedom that lies in total submission to Allah and His law. That law, sharia, is diametrically opposed to core components of freedom as understood in the West – beginning with the very idea that man is free to make law for himself, irrespective of what Allah has ordained. It is thus delusional to believe, as the West's Arab Spring fable insists, that the region teems with Jamal al-Madisons holding aloft the lamp of liberty. Do such revolutionary reformers exist? Of course they do . . . but in numbers barely enough to weave a fictional cover story. When push came to shove – and worse – the reformers were overwhelmed, swept away by a tide of Islamic supremacism, the dynamic, consequential mass movement that beckons endless winter. That is the real story of the Arab Spring – that, and the Pandora's Box that opens when an American administration aligns with that movement, whose stated goal is to destroy America.

Changing the Face of Engineering John Brooks Slaughter,Yu Tao,Willie Pearson,2015-12-15 The underrepresentation of

African Americans in STEM fields in general, and in engineering in particular, according to John Slaughter is at best benign neglect, and at worst active discrimination. In one of the first broad-based studies of the African American experience in engineering, Slaughter and his coeditors set out to describe the problem and propose workable solutions in the form of education and public policy initiatives. In this book, twenty-four eminent scholars address this shortfall from a wide variety of disciplinary angles. They draw insight from robust statistical analyses and contextualized analyses grounded in personal narratives of African American engineers and instructors at a diverse set of research institutions with evidenced-based approaches to their success in graduating African American engineers. This definitive volume will certainly be of interest to scholars and policymakers--

The Dialectic of Digital Culture David Arditi, Jennifer Miller, 2019-08-01 This edited collection analyzes dialectically the role of digital technology in contemporary society. The contributors identify the cultural logics and oppressive forces reproduced in the digital era and challenge celebratory readings of digital technology.

Terrorism TV Stacy Takacs, 2012-04-30 The Fox-TV series 24 might have been in production long before its premier just two months after 9/11, but its storyline—and that of many other television programs—has since become inextricably embedded in the nation's popular consciousness. This book marks the first comprehensive survey and analysis of War on Terror themes in post-9/11 American television, critiquing those shows that—either blindly or intentionally—supported the Bush administration's security policies. Stacy Takacs focuses on the role of entertainment programming in building a national consensus favoring a War on Terror, taking a close look at programs that comment both directly and allegorically on the post-9/11 world. In show after show, she chillingly illustrates how popular television helped organize public feelings of loss, fear, empathy, and self-love into narratives supportive of a controversial and unprecedented war. Takacs examines a spectrum of program genres—talk shows, reality programs, sitcoms, police procedurals, male melodramas, war narratives—to uncover the recurrent cultural themes that helped convince Americans to invade Afghanistan and Iraq and compromise their own civil liberties. Spanning the past decade of the ongoing conflict, she reviews not only key touchstones of post-9/11 popular culture such as 24, Rescue Me, and Sleeper Cell, but also less remarked-upon but relevant series like JAG, Off to War, Six Feet Under, and Jericho. She also considers voices of dissent that have emerged through satirical offerings like The Daily Show and science fiction series such as Lost and Battlestar Galactica. Takacs dissects how the War on Terror has been broadcast into our living rooms in programs that routinely offer simplistic answers to important questions—Who exactly are we fighting? Why do they hate us?—and she examines the climate of fear and paranoia they've created. Unlike cultural analyses that view the government's courting of Hollywood as a conspiracy to manipulate the masses, her book considers how economic and industry considerations complicate state-media relations throughout the era. Terrorism TV offers fresh insight into how American television directly and indirectly reinforced the Bush administration's

security agenda and argues for the continued importance of the medium as a tool of collective identity formation. It is an essential guide to the televisual landscape of American consciousness in the first decade of the twenty-first century.

Birth 2012 and Beyond Barbara Marx Hubbard,2012-05-01 Explaining how the planet's myriad crises are actually the birth pangs of a new Earth, this inspired exploration is Barbara Marx Hubbard's prophetic call for a planetary shift. It explores the aftermath of the coming planetary renaissance that she has heralded for decades, and introduces an established popular global movement to cocreate a massive transition around a symbolic "Planetary Birthday" event on December 22, 2012. This volume features 12 evolutionary pioneers' commentary on the author's key themes of collective birth and conscious evolution, aiming to foster the emergence of a sustainable planetary civilization. Featured contributors include Ervin Laszlo, Michael Beckwith, Jack Canfield, Jean Houston, and Neale Donald Walsch.

Electronic Commerce Efraim Turban,David King,Jae Kyu Lee,Ting-Peng Liang,Deborrah C. Turban,2015-01-29 Throughout the book, theoretical foundations necessary for understanding Electronic Commerce (EC) are presented, ranging from consumer behavior to the economic theory of competition. Furthermore, this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields, including a senior vice president of an e-commerce-related company. The authors provide website resources, numerous exercises, and extensive references to supplement the theoretical presentations. At the end of each chapter, a list of online resources with links to the websites is also provided. Additionally, extensive, vivid examples from large corporations, small businesses from different industries, and services, governments, and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce. These examples, which were collected by both academicians and practitioners, show the reader the capabilities of EC, its cost and justification, and the innovative ways corporations are using EC in their operations. In this edition (previous editions published by Pearson/Prentice Hall), the authors bring forth the latest trends in e-commerce, including social businesses, social networking, social collaboration, innovations, and mobility.

Updating to Remain the Same Wendy Hui Kyong Chun,2017-08-11 What it means when media moves from the new to the habitual—when our bodies become archives of supposedly obsolescent media, streaming, updating, sharing, saving. New media—we are told—exist at the bleeding edge of obsolescence. We thus forever try to catch up, updating to remain the same. Meanwhile, analytic, creative, and commercial efforts focus exclusively on the next big thing: figuring out what will spread and who will spread it the fastest. But what do we miss in this constant push to the future? In *Updating to Remain the Same*, Wendy Hui Kyong Chun suggests another approach, arguing that our media matter most when they seem not to matter at all—when they have moved from "new" to habitual. Smart phones, for example, no longer amaze, but they increasingly structure and monitor our lives. Through habits, Chun says, new media become embedded in our lives—indeed, we become our machines: we stream, update, capture, upload, link, save, trash, and troll. Chun links habits to the rise of

networks as the defining concept of our era. Networks have been central to the emergence of neoliberalism, replacing “society” with groupings of individuals and connectable “YOUS.” (For isn't “new media” actually “NYOU media”?) Habit is central to the inversion of privacy and publicity that drives neoliberalism and networks. Why do we view our networked devices as “personal” when they are so chatty and promiscuous? What would happen, Chun asks, if, rather than pushing for privacy that is no privacy, we demanded public rights—the right to be exposed, to take risks and to be in public and not be attacked?

Overcoming Your Shadow Mission John Ortberg,2008-09-02 The challenges, isolation, and relentless demands of leadership can inspire a variety of fears in the heart of a leader; among them fear of failure, fear of mutiny, fear of criticism, fear of disappointing people. However, the greatest fear leaders face is not something that might happen to them, but something that can happen in them—a degeneration of the heart that robs them of their calling and leaves a deep soul dissatisfaction in its place. John Ortberg describes this menacing fear in terms of mission and shadow mission. A mission is the highest purpose to which God calls us; a shadow mission is an authentic mission that has been derailed, often in imperceptible ways. Ortberg writes, “Part of what makes the shadow mission so tempting is that it’s usually so closely related to our gifts and passions. It’s not 180 degrees off track; it is just 10 degrees off track, but that 10 degrees is in the direction of hell.” Every leader has a mission—and a shadow mission. Even Jesus had to battle a shadow mission; it was to be a leader without suffering—to be the Messiah without the cross. Ortberg writes, “If we fail to embrace our true mission, we will live out our shadow mission. We will let our lives center around things that are unworthy, selfish and dark.” Using characters from the remarkable Old Testament story of Esther, Ortberg demonstrates the disastrous consequences of succumbing to shadow mission, and the stunning rewards of whole-hearted commitment to mission. With characteristic humor and insight, the author invites us to follow Esther’s example and courageously choose to embrace the mission God gives. Like Esther, we can lead without fear—even in threatening circumstances—because we know God is always at work in unseen, unknown and unlikely ways.
