*Creating Online Tutorials* Hannah Gascho Rempel, Maribeth Slebodnik, 2024-02-14 Today's students rely heavily on electronic resources; they expect to be able to access library resources from any location and at any time of the day. Online education is ubiquitous from K-12 through graduate level coursework and is increasingly used in on-the-job training. Libraries must be prepared to guide learners to use library resources when and where they are needed. Thoughtfully designed online tutorials can be the library's answer to providing this point-of-need instruction that learners have come to expect. When librarians don't have the technical expertise needed to create online tutorials, *Creating Online Tutorials: A Practical Guide for Librarians, Second Edition* will help guide them through the basics of designing and producing an online tutorial. Using practical examples, the book leads librarians through the process of creating an online tutorial from start to finish and provides tips and strategies that will be useful to librarians with more experience in designing online tutorials. This detailed roadmap for designing and producing online tutorials covers: Is a tutorial the right solution? Assessing diverse user needs Choosing the right technology Selecting and organizing instructional content Planning tutorial design elements Integrating assessment into tutorial design Maintaining and updating tutorials Finding online tutorial resources After reading this book, new tutorial developers will have a practical, adaptable blueprint that enables them to confidently address the creation of their first online tutorials, and experienced developers will learn efficient techniques to create and enhance future tutorials that are attractive, effective teaching tools.

**Fourth Grade Technology** Ask a Tech Teacher, 2020-04-12 Used world-wide as a definitive technology curriculum, this six-volume series (Fourth Edition, 2011) is the all-in-one solution to running an effective, efficient, and fun technology program whether you're the lab specialist, IT coordinator, classroom teacher, or homeschooler. It is the choice of hundreds of school districts across the country, private schools nationwide and teachers around the world. Each volume includes step-by-step directions for a year's worth of projects, samples, grading rubrics, reproducibles, wall posters, teaching ideas and hundreds of online connections to access enrichment material and updates from a working technology lab. Aligned with ISTE national technology standards, the curriculum follows a tested timeline of which skill to introduce when, starting with mouse skills, keyboarding, computer basics, and internet/Web 2.0 tools in Kindergarten/First; MS Word, Publisher, Excel, PowerPoint, Google Earth, internet research, email and Photoshop in Second/Fifth. Each activity is integrated with classroom

units in history, science, math, literature, reading, writing, critical thinking and more. Whether you're an experienced tech teacher or brand new to the job, you'll appreciate the hundreds of embedded links that enable you to stay on top of current technology thinking and get help from active technology teachers using the program. Extras include wall posters to explain basic concepts, suggestions for keyboarding standards, discussion of how to integrate Web 2.0 tools into the classroom curriculum and the dozens of online websites to support classroom subjects.

**How to Achieve the Common Core with Tech** Ask a Tech Teacher,2013-06-05 257 pages, 28 projects, over 200 Common Core standards, for 9 grades (K-8). How to Achieve Common Core with Tech--the Writing Strand is part of a five-volume series that focuses on using technology to meet Common Core standards in Language, Writing, Reading, Speaking/Listening, and Math.

Strategies for Building a Web 2.0 Learning Environment Chih-Hsiun Tu,2013-11-20 Imagine replacing your current online Learning Management System (LMS) with social media and Web 2.0 tools! This book provides a comprehensive and easy-to-understand guide for making the most of the online learning environment. The integration of Web 2.0 tools into an online learning environment requires more than just connecting technology: it involves a paradigm shift from online learning to open network learning. Strategies for Building a Web 2.0 Learning Environment provides a comprehensive and effective guide for teachers and trainers interested in integrating the concept of Personal Learning Environment (PLE) and Open (or Social) Network Learning Environment (ONLE) into any learning environment that utilizes online instruction. Rather than focusing on esoteric theory, the book offers a design model, practical guidelines, and sample activities that are based on current, well-grounded frameworks as well as the author's extensive online teaching experiences and personal research. Classroom teachers, school administrators, online learning researchers, corporate trainers, and corporate administrators will find that the innovative ideas set forth in this book are accompanied by practical guidelines for implementation.

Engage your students by delving into the Common Core ELA standards with the tools they use the most. As you explore the creative road to academic success, with the Common Core ELA and literacy standards—you will turn your classroom into a student-centered learning environment that fosters collaboration, individualizes instruction, and cultivates technological literacy. Features include: Specific recommendations for free apps and tech tools that support the Common Core Step-by-step guidelines to breaking down standards by grade and subject Teacher-tested, research-supported lesson ideas and strategies Replicable resources, including prewriting activities and writing templates Real-life examples

*Going Google* Jared Covili,2012-03-19 Google your way to greatness!This book for K-12 educators explores the wide array of Google tools and shows how to use them in the classroom. Appropriate for experienced Googlers as well as novices, the

text is organized into parts according to the 21st-century skills each tool promotes. Included are specific classroom activities that teachers can use with students immediately. An interactive website offers video tutorials that support the instructions and an online community for sharing successes.

**Digital Tools for Teaching** Steve Johnson, 2011 In this Web 2.0 world, your students are communicating, customizing, and creating like never before. It's no surprise, therefore, that standards for the twenty-first century classroom recognize the value of teaching with digital tools. Knowing how to effectively teach with them is another matter altogether. In *Digital Tools for Teaching*, educator and self-proclaimed techno-geek Steve Johnson shows you how to transform 30 cutting-edge e-tools into powerful vehicles for teaching--and learning. You will find: An array of low-to-no-cost digital tools ranging in complexity and all focused on educational merit; Step-by-step instructions that take the mystery out of using each e-tool; Lesson connections and lists of classroom-proven ideas for applying each e-tool across the curriculum; Backdoor links to the special services and discounts available to teachers for many of the digital tools profiled in this book; Standards-based assessment rubrics and strategies (including how to implement digital portfolios) to help you meet twenty-first century classroom instructional goals; and Links to Steve Johnson's website and blog for news and updates on incorporating technology-based activities into your lessons. Complete and ready-to-use, *Digital Tools for Teaching* shows you how to connect your teaching to the e-tools that are relevant to your students' lives. Whether you're already an advanced e-tool user or a newbie, *Digital Tools for Teaching* will increase your confidence using digital tools, broaden your perspective, and give you new teaching strategies that you can use tomorrow.

**Integrating Technology in the Classroom** Boni Hamilton, 2022-08-11 Discover new and immediately applicable tools and practices to support collaborative, student-centered learning. Teachers possess unique skills, knowledge and experience. So why should their approaches to classroom technology look the same? In this new edition of the popular book *Integrating Technology in the Classroom*, author Boni Hamilton presents technology tools and projects that resonate with your teaching style, classroom context and technology skill level all while helping students achieve academic growth. In this new edition, you'll find:

- Coverage of programming, game creation, and augmented and virtual reality.
- Stories of teachers who have successfully employed technology in the classroom, with more examples from secondary-level teachers, including visual learning preferences and kinesthetic/tactile learning.
- Deeper explanation of how to leverage technology to meet multilingual needs.
- A new chapter on leveraging technology to meet adaptive needs, including examples from teachers who use adaptive technologies in regular classrooms.
- Strategies that address efficiency needs of teachers, to help make administrative tasks less onerous, and coverage of learning management systems, formative assessment sites, and planning tools.
- Professional development coverage that includes information on ISTE offerings, social media, and other supports.

Explore how technology tools can support your instructional goals and help you meet the individual needs of all learners.

Friending the Past Alan Liu,2018-11-27 Can today's society, increasingly captivated by a constant flow of information, share a sense of history? How did our media-making forebears balance the tension between the present and the absent, the individual and the collective, the static and the dynamic—and how do our current digital networks disrupt these same balances? Can our social media, with its fleeting nature, even be considered social at all? In *Friending the Past*, Alan Liu proposes fresh answers to these innovative questions of connection. He explores how we can learn from the relationship between past societies whose media forms fostered a communal and self-aware sense of history—such as prehistorical oral societies with robust storytelling cultures, or the great print works of nineteenth-century historicism—and our own instantaneous present. He concludes with a surprising look at how the sense of history exemplified in today's JavaScript timelines compares to the temporality found in Romantic poetry. Interlaced among these inquiries, Liu shows how extensive “network archaeologies” can be constructed as novel ways of thinking about our affiliations with time and with each other. These conceptual architectures of period and age are also always media structures, scaffolded with the outlines of what we mean by history. Thinking about our own time, Liu wonders if the digital, networked future can sustain a similar sense of history.

Researching and Writing Dissertations Roy Horn,2012-02-01 From finding a topic to writing and reviewing your work, *Researching and Writing Dissertations* is an essential tool for anyone working on a dissertation or business report. This new edition is now suitable for students studying the CIPD Level 7 Advanced units Investigating a Business Issue and Using Information in HR but is equally relevant for all non-CIPD students too. Covering everything from strategies for finding and developing a dissertation topic and how to develop a research proposal through to what methodology to use and how to analyse your data, this is the only book you need to write clear, effective and compelling dissertations and reports. In addition to practical guidance on the researching and writing up of projects, this book includes essential guidance on effective time management and how to ensure that projects are completed and submitted on time as well as invaluable insights through real-life student and supervisor comments. Fully supported by online resources including an instructor's manual and lecturer slides as well as templates, checklists and quizzes for students, *Researching and Writing Dissertations* is a book that anyone working on dissertations, research projects or business reports can't afford to be without.

Cultivating Communication in the Classroom Lisa Johnson,2017-02-23 Building 21st Century communication skills Students are expected to be innovators, creative thinkers, and problem solvers. But what if they can't communicate their ideas persuasively? Just because many students are raised communicating through technology doesn't mean they know how to use it effectively. Knowing how to share ideas is as crucial as the ideas themselves. Unfortunately, many students don't get explicit opportunities to hone this skill. *Cultivating Communication in the Classroom* will help educators design authentic learning experiences that allow students to practice their skills. Readers will find: Real world insights into how students will

be expected to communicate in their future careers and education Strategies for teaching communication skills throughout the curriculum Communication Catchers for igniting ideas Interviews with industry experts Tools for building 21st Century skills Written by Tech Chef Lisa Johnson, this book demonstrates how communication can be taught through the lens of college and career readiness. This book is the most practical guide I have seen to truly help secondary students be 'future ready.' The advice and tips that Lisa shares should become a standard digital literacy read for all middle school and high school students. Kyle Pace, Instructional Technology Coach Grain Valley School District, Kansas City, Missouri This book has an unbelievable amount of tips, ideas and great advice for communicating in the 21st century. It's not only helpful for teaching students to be better communicators but adults as well! Jennie Magiera, Chief Technology Officer Des Plaines School District 62, IL

Robotics in Education Richard Balogh, David Obdržálek, Eftychios Christoforou, 2023-11-04 This book provides an overview of Educational Robotics and includes information that reflects the current status of the field, research activity, experiences, and new tools. It compiles the contributions presented at the 14th International Conference on Robotics in Education (RiE2023). Beyond insights into theoretical aspects, practical projects and syllabus activities exemplify the concepts and provide implementation ideas, which span the whole educational system from kindergarten to the university level. The relevance to science, technology, engineering, and mathematics (STEM) education is highlighted by teaching the topics in a unified framework. The book constitutes a valuable resource for educators, researchers, scientists, and engineers interested in robotics. It covers topics including school teaching curricula, educational methodologies and pedagogy, projects, competitions, hardware, simulations, programming, machine learning, and artificial intelligence in education.

**Design Thinking Research** Larry Leifer, Hasso Plattner, Christoph Meinel, 2013-08-19 This book summarizes the results of Design Thinking Research carried out at Stanford University in Palo Alto, California, USA, and Hasso Plattner Institute in Potsdam, Germany. The authors offer readers a closer look at Design Thinking with its processes of innovations and methods. The contents of the articles range from how to design ideas, methods, and technologies via creativity experiments and wicked problem solutions, to creative collaboration in the real world and the connectivity of designers and engineers. But the topics go beyond this in their detailed exploration of design thinking and its use in IT systems engineering fields and even from a management perspective. The authors show how these methods and strategies work in companies, introduce new technologies and their functions and demonstrate how Design Thinking can influence as diverse a topic area as marriage. Furthermore, we see how special design thinking use functions in solving wicked problems in complex fields. Thinking and creating innovations are basically and inherently human - so is Design Thinking. Due to this, Design Thinking is not only a factual matter or a result of special courses nor of being gifted or trained: it's a way of dealing with our environment and improving techniques, technologies and life.

**Teaching 21st Century Skills** Rekha B. Koul,Rachel Sheffield,Leonie McIlvenny,2021-11-10 This book helps educators provide opportunities for their students to engage in creative and collaborative projects that blur the lines between subjects and promote problem-finding and problem-solving activities. It offers a global perspective on makerspaces through an Indian and Australian lens, illustrating the commonalities between the approach and the pedagogy in order to highlight the universal nature of these essential 21st-century skills. The book is particularly useful for science, technology and mathematics teachers, highlighting the potential of engaging in a more integrated curriculum approach to their specific discipline. It is of great interest to scholars whose research focuses on understanding 21st-century skills and how they can be taught and assessed in a school setting. It is an indispensable resource for teacher educators, school administrators, curriculum designers, policymakers and researchers in the field of science education.

**Google for Lawyers** Carole A. Levitt,Mark E. Rosch,2010 This step-by-step guide explores Google's most popular features plus its newest and least-known features, productivity tools, and services.

*Practical Peer-to-Peer Teaching and Learning on the Social Web* Hai-Jew, Shalin,2021-11-19 On the Social Web, people share their enthusiasms and expertise on almost every topic, and based on this, learners can find resources created by individuals with varying expertise. Through this trend and the wide availability of video cameras and authoring tools, people are creating DIY resources and sharing their knowledge, skills, and abilities broadly. While these resources are increasing in availability, what has not been explored is the effectiveness of these resources, peer-to-peer teaching and learning, and how well this content prepares learners for professional roles. *Practical Peer-to-Peer Teaching and Learning on the Social Web* explores the efficacies of online teaching and learning with materials by peers and provides insights into what is made available for teaching and learning by the broad public. It also considers intended and unintended outcomes of open-shared learning online and discusses practical ethics in teaching and learning online. Covering topics such as learner roles and instructional design, it is ideal for teachers, instructional designers and developers, software developers, user interface designers, researchers, academicians, and students.

**Project Management Metrics, KPIs, and Dashboards** Harold Kerzner,2017-08-30 Harold Kerzner's essential strategies on measuring project management performance With the growth of complex projects, stakeholder involvement, and advancements in visual-based technology, metrics and KPIs (key performance indicators) are key factors in evaluating project performance. Dashboard reporting systems provide accessible project performance data, and sharing this vital data in a concise and consistent manner is a key communication responsibility of all project managers. This third edition of Kerzner's groundbreaking work, *Project Management Metrics, KPIs, and Dashboards: A Guide to Measuring and Monitoring Project Performance*, helps functional managers gain a thorough grasp of what metrics and KPIs are and how to use them. Plus, this edition includes new sections on processing dashboard information, portfolio management PMO and metrics, and

BI tool flexibility. • Offers comprehensive coverage of the different dashboard types, design issues, and applications Provides full-color dashboards from some of the most successful project management companies, including IBM, Microsoft, and others Aligns with PMI's PMBOK® Guide and stresses value-driven project management PPT decks are available by chapter and a test bank will be available for use in seminar presentations and courses Get ready to bolster your awareness of what good metrics management really entails today—and be armed with the knowledge to measure performance more effectively.

**Building the Intentional University** Stephen M. Kosslyn, Ben Nelson, 2018-08-28 How to rebuild higher education from the ground up for the twenty-first century. Higher education is in crisis. It is too expensive, ineffective, and impractical for many of the world's students. But how would you reinvent it for the twenty-first century—how would you build it from the ground up? Many have speculated about changing higher education, but Minerva has actually created a new kind of university program. Its founders raised the funding, assembled the team, devised the curriculum and pedagogy, recruited the students, hired the faculty, and implemented a bold vision of a new and improved higher education. This book explains that vision and how it is being realized. The Minerva curriculum focuses on “practical knowledge” (knowledge students can use to adapt to a changing world); its pedagogy is based on scientific research on learning; it uses a novel technology platform to deliver small seminars in real time; and it offers a hybrid residential model where students live together, rotating through seven cities around the world. Minerva equips students with the cognitive tools they need to succeed in the world after graduation, building the core competencies of critical thinking, creative thinking, effective communication, and effective interaction. The book offers readers both the story of this grand and sweeping idea and a blueprint for transforming higher education.
