Lockhart,2022-05-03 #1 NEW YORK TIMES BESTSELLER • The addictive prequel to the TikTok phenomenon *We Were Liars*: the story of another summer, another generation—and the secrets that will haunt them for decades to come. *The Aisles Have Eyes* Joseph Turow,2017-01-17 The author of *Media Today* offers “a trenchant, timely, and troubling account of [retailers’] data-mining, in-store tracking, and predictive analytics” (The Philadelphia Inquirer). By one expert’s prediction, within twenty years half of Americans will have body implants that tell retailers how they feel about specific products as they browse their local stores. The notion may be outlandish, but it reflects executives’ drive to understand shoppers in the aisles with the same obsessive detail that they track us online. In fact, a hidden surveillance revolution is already taking place inside brick-and-mortar stores, where Americans still do most of their buying. Drawing on his interviews with retail executives, analysis of trade publications, and experiences at insider industry meetings, advertising and digital studies expert Joseph Turow pulls back the curtain on these trends, showing how a new hyper-competitive generation of merchants—including Macy’s, Target, and Walmart—is already using data mining, in-store tracking, and predictive analytics to change the way we buy, undermine our privacy, and define our reputations. Eye-opening and timely, Turow’s book is essential reading to understand the future of shopping. “Turow shows shopping today to be an exercise in unwitting self-

revelation—and not only online.”—The Wall Street Journal “Thoroughly researched and clearly presented with detailed evidence and fascinating peeks inside the retail industry. Much of this information is startling and even chilling, particularly when Turow shows how retail data-tracking can enable discrimination and societal stratification.”—Publishers Weekly “Revealing . . . Valuable reading for shoppers and retailers alike.”—Kirkus Reviews

**The Forgotten First** Keyshawn Johnson,Bob Glauber,2021-09-21 The unknown story of the Black pioneers who collectively changed the face of the NFL in 1946. THE FORGOTTEN FIRST chronicles the lives of four incredible men, the racism they experienced as Black players entering a segregated sport, the burden of expectation they carried, and their many achievements, which would go on to affect football for generations to come. More than a year before Jackie Robinson broke the color barrier in Major League Baseball, there was another seismic moment in pro sports history. On March 21,1946, former UCLA star running back Kenny Washington—a teammate of Robinson's in college—signed a contract with the Los Angeles Rams. This ended one of the most shameful periods in NFL history, when African-American players were banned from league play. Washington would not be alone in serving as a pioneer for NFL integration. Just months after he joined the Rams, thanks to a concerted effort by influential Los Angeles political and civic leaders, the team signed Woody Strode, who played with both Washington and Robinson at UCLA in one of the most celebrated backfields in college sports history. And that same year, a little-known coach named Paul Brown of the fledgling Cleveland Browns signed running back Marion Motley and defensive lineman Bill Willis, thereby integrating a startup league that would eventually merge with the NFL. THE FORGOTTEN FIRST tells the story of one of the most significant cultural shifts in pro football history, as four men opened the door to opportunity and changed the sport forever.

*How We Decide* Jonah Lehrer,2010-01-14 The first book to use the unexpected discoveries of neuroscience to help us make the best decisions Since Plato, philosophers have described the decision-making process as either rational or emotional: we carefully deliberate, or we “blink” and go with our gut. But as scientists break open the mind’s black box with the latest tools of neuroscience, they’re discovering that this is not how the mind works. Our best decisions are a finely tuned blend of both feeling and reason—and the precise mix depends on the situation. When buying a house, for example, it’s best to let our unconscious mull over the many variables. But when we’re picking a stock, intuition often leads us astray. The trick is to determine when to use the different parts of the brain, and to do this, we need to think harder (and smarter) about how we think. Jonah Lehrer arms us with the tools we need, drawing on cutting-edge research as well as the real-world experiences of a wide range of “deciders”—from airplane pilots and hedge fund investors to serial killers and poker players. Lehrer shows how people are taking advantage of the new science to make better television shows, win more football games, and improve military intelligence. His goal is to answer two questions that are of interest to just about anyone, from CEOs to firefighters: How does the human mind make decisions? And how can we make those decisions better?

*The AI Marketing Canvas* Raj Venkatesan,Jim Lecinski,2021-05-18 This book offers a direct, actionable plan CMOs can use to map out initiatives that are properly sequenced and designed for success—regardless of where their marketing organization is in the process. The authors pose the following critical questions to marketers: (1) How should modern marketers be thinking about artificial intelligence and machine learning? and (2) How should marketers be developing a strategy and plan to implement AI into their marketing toolkit? The opening chapters provide marketing leaders with an overview of what exactly AI is and how is it different than traditional computer science approaches. Venkatesan and Lecinski, then, propose a best-practice, five-stage framework for implementing what they term the AI Marketing Canvas. Their approach is based on research and interviews they conducted with leading marketers, and offers many tangible examples of what brands are doing at each stage of the AI Marketing Canvas. By way of guidance, Venkatesan and Lecinski provide examples of brands—including Google, Lyft, Ancestry.com, and Coca-Cola—that have successfully woven AI into their marketing strategies. The book concludes with a discussion of important implications for marketing leaders—for your team and culture.

**A Call to Resurgence** Mark A. Driscoll, 2013 It's tempting to believe that the Christian faith is alive and well in our country today. Our politicians talk about God. Our mega-churches are filled. Christian schools dot our landscape. Brace yourself. It's an illusion. Believe it or not, only 8 percent of Americans profess and practice true evangelical Christian faith. There are more left-handed people than evangelical Christians in America. In this book, Mark Driscoll delivers a wake-up call for every believer: We are living in a post-Christian culture—a culture fundamentally at odds with faith in Jesus. This is good and bad news. The good news is that God is still working, redeeming people from this spiritual wasteland and inspiring a resurgence of faithful believers. The bad news is that many believers just don't get it. They continue to gather exclusively into insular tribes, lobbing e-bombs at each other in cyberspace. Mark's book is a clarion call for Christians. It's time to get to work. We can only do this if we unite around Jesus and the essentials found in his Word, while at the same time, appreciating the distinctives within each Christian tribe. Mark shows us how to do just that. This isn't the time to wait or debate. Join the resurgence.
