Get Your Photography on the Web Rafael Concepcion, 2011-02-08 For today's photographer, a clean, professional-looking website is a must. But for most, the thought of having a site that displays your work like a pro seems either too expensive or too hard to create. How can you develop an eye-catching website that looks professional, updates quickly, and even helps you make some money in the process when your passion is photography and not coding? It's easier than you think. In *Get Your Photography on the Web*, RC Concepcion, curriculum developer for Kelby Media Group and one of the Photoshop Guys, takes you through an easy step-by-step process so you can build your own site from the ground up and have it look like you paid someone a lot of money to do it for you. Even if you know nothing about Web programming, this book will have you building a website in hours, not weeks. You'll learn: How to secure your own domain names and hosting space How to install WordPress on your website in as little as seven clicks How to add pictures, galleries, and Flash portfolios without learning any code How to sell your images online without having to make a single print How to incorporate Lightroom and Flash galleries into an already existing website You'll also find interviews and inspirational tips from people you will meet "Along the Way" to making your website. Plus, RC gives you free templates and Flash portfolio components to get you up and running without emptying your wallet. The techniques RC shares in *Get Your Photography on the Web* are the very same ones he uses for some of the biggest names in photography—it's like designing your website with a trusted expert looking over your shoulder. Best of all, you'll walk away with the satisfaction of knowing that you did it all yourself!

Microsculpture Levon Biss, 2017-10-10 You will never look at a beetle or a moth the same way again. --WIRED Art meets science to dazzling effect. --The Guardian *Microsculpture* is a unique photographic study of insects in mind-blowing magnification that celebrates the wonders of nature and science. Levon Biss's photographs capture in breathtaking detail the beauty of the insect world and are printed in large-scale format to provide an unforgettable viewing experience. Each picture in *Microsculpture* is created from approximately 8,000 individual photographs. Segments of the specimen are lit and photographed separately using microscope lenses, then "stacked" to maintain sharp focus throughout. These images are then combined to create a single high-resolution file. From start to finish, each portrait takes approximately 4 weeks to create. The project has captured the attention of the world with features in WIRED and New Scientist. *Microsculpture* has been exhibited at the Oxford University Museum of Natural History and the Xposure 2016 International Photography Festival in Sharjah, U.A.E. It has been viewed by over half a million people so far and will be touring museums around the world from 2017 onward. The entomology collection has significant cultural and historical value, containing the world's oldest pinned insect specimen and many thousands of insects collected by pioneering Victorian explorers and biologists such as Charles Darwin and Alfred Russell Wallace.
